

ABSTRACT OF THE DISCLOSURE

The present invention provides an ink-jet recording medium including a support having disposed thereon at least one colorant-receiving layer, wherein an undercoat layer containing an inorganic laminar compound with an aspect ratio of 100 or more is provided under the colorant-receiving layer, and/or a back-coat layer containing an inorganic laminar compound with an aspect ratio of 100 or more is provided on a surface opposite to a surface of the support having the colorant-receiving layer.
